Ans: Gas and electricity are the most important facilities in our urban life. Sometimes we may face problems in the supply system. In this case we need to repair.

7. Descriptive Questions:

a) What weather conditions can damage buildings and roads?

Ans: In the urban and rural areas many roads and buildings are built for our welfare. We know that Bangladesh is a disaster prone country. For this storm, heavy rainfall, flood occurred and can damage these resources. Roads are mainly damaged because of heavy rainfall. Because of storm and flood houses and buildings are damaged. So, buildings roads and other structures are effect by the bad weather condition.

b) Whose responsibility is it to carry out the repair in a locality?

Ans: The government manages a lot of benefits for the welfare of the citizen. Our lives become easy through these facilities. So, these required some repairing and caring. To repair these, Government needs lots of money to pay. But only Government cannot do all the repairing works in our locality. Along with the Government we have to take part actively in all the development activities of our locality.
